AGM 12/225 (group 8D)

Product code: 62002250

In AGM batteries, the electrolyte (mixture of water and sulphuric acid) is largely absorbed in glass fibre. This type of battery is entirely maintenance-free and there is no gas formation with normal use. AGM batteries can be installed anywhere.

Their construction gives a very fast discharge at very high currents so AGM batteries are ideal for systems that require high currents (for instance when starting an engine). The battery poles can be unscrewed and this type of battery can be combined with every standard battery terminal.

- · Excellent starter function.
- · Perfect upgrade for flooded lead acid batteries.
- \cdot Same initial power surge in an AGM 12/90 Ah as 180 Ah flooded lead-acid battery.
- · Glass-fibre technology ensures low internal resistance.
- · Use of thicker plates extends lifespan.
- · Can be combined with every standard battery terminal.
- · Also for medium cyclical use.
- · Two year warranty.

Specifications

General specifications

Nominal battery voltage 12 V
Nominal battery capacity C20 225 Ah
Max. charge current 63 A
Terminals M8 / A-type
Outside dimensions, lxwxh (incl. handles, without automotive terminal 522 x 240 x

Outside dimensions, lxwxh (incl. handles, without automotive terminal post) 522 x 240 x 224 mm 20.6 x 9.4 x 8.8 inch

Weight 63.5 kg 140.0 lb

Technical specifications

 CCA to DIN
 680 A

 CCA to SAE
 1080 A
