AGM-SL 12/185

Product code: 63001850

In AGM batteries, the electrolyte (mixture of water and sulphuric acid) is largely absorbed in glass fibre. This type of battery is entirely maintenance-free and there is no gas formation with normal use. AGM batteries can be installed anywhere.

Their construction gives a very fast discharge at very high currents so AGM batteries are ideal for systems that require high currents (for instance when starting an engine). The battery poles can be unscrewed and this type of battery can be combined with every standard battery terminal.

- · Ideal universal and very slim battery; also suitable for starter functions.
- · Compressed AGM technology.
- · Saves up to 15 % in volume.
- · Saves up to 15 % in weight.
- · Miniscule footprint; 2x 185 Ah for a 200 Ah battery footprint.
- · Convenient M6 connections.
- · Two year warranty.

Specifications

General specifications

Nominal battery voltage 12 V
Nominal battery capacity C20 185 Ah
Max. charge current 53 A
Terminals M6

Max. outer dimensions (incl. terminals/grip handles), lxwxh $560 \times 126 \times 280 \text{ mm}$ $22.0 \times 5.0 \times 11.0 \text{ inch}$

Weight 51.2 kg 112.9 lb

Technical specifications

 CCA to DIN
 580 A

 CCA to SAE
 930 A
