

Touch 5 Retrofit plate 12 V

Product code: 80-911-0135-00

To replace an existing 3.5" Display Interface with the Touch 5 a retrofit plate should be ordered to cover old cutout.

NOTE: the Touch 5 requires a 12 V supply (not 24 V), so a suitable 24 V to 12 V converter should be installed on systems with a 24 V supply.

A 24 V to 12 V converter is supplied as standard with article number 80-911-0136-00.
