# **IVET 2.5**

Product code: 85000250

A safe connection between vessel and shore installation is an essential part of your electrical system. A galvanic electrical isolation between shore power and the on board power prevents any electrical corrosion of metal parts while keeping you earthed.

### **IVET Heavy-duty Series**

High-output E-core isolation transformer without casing, for self installation. The product is multi tap, meaning you can handle 120/230/240 V going in and out.

Mastervolt recommends to install the IVET heavy-duty isolation transformer with Soft Start. Soft Start suppresses the inrush current from the transformer and prevents the power fuse from blowing.

- · High-quality isolation transformers without casing for self installation.
- · Optional Soft Start, in synthetic casing.
- · Capacities of 2.5 kW to 22 kW.
