

# Data Control Portal

Product code: 130394320

# Comprehensive data logger with online monitoring

The Data Control Portal collects all the data from your PV system, monitors its performance and warns you in case of problems. All important data are displayed in a clear overview and can be called up via internet from anywhere and at anytime.

## **Data Control Portal: easy, effective and versatile**

Maximising the energy output of your PV system requires the timely identification and quick solving of any problems that may arise. To achieve this, the Data Control Portal has various powerful functions that ensure an optimal performance of your PV system.

## **Login to Data Control Portal, to access your PV installation**
